

### *Logan River Results*

The Logan River golf course was undergoing major club house renovations, but the golf course was in very good shape. Some of the cart paths were under water, but we could see that the water was receding even as we played the new back nine twice each day (previously it was the front nine). There were 32 couples that took advantage of no green fees. We got to see Canadian Geese (more than we really needed to see!), ducks with little families, white-faced ibis (which are all black!!), rock chucks aplenty, trout in the ponds, and even an occasional pheasant. Great weekend!!
